This educational event is brought to you by:

Margaret Skinner, Bruce L. Parker, Don Tobi & Cheryl Sullivan
UVM Entomology Research Laboratory

&

Chris Callahan
UVM Extension

and

Northeast Sustainable Agriculture Research & Education Program
USDA Natural Resources Conservation Service
UVM Extension System

Greenhouse energy conservation is critical to maximize profits and reduce growers' energy footprint.

What can YOU do about it? Growers can minimize production costs by making inexpensive improvements to their existing greenhouses. They also can install special energy conserving devices to enhance energy savings.

Regional experts are coming to share their knowledge about **energy conservation!** Attendees will learn tips on how to reduce energy use at minimal cost that can be implemented before the snow flies this winter. The VT **Bubble Greenhouse prototype** will also be **showcased**. USDA will be on hand to describe what supports for energy conservation are available for growers.

Who should come? Growers with greenhouses and ones that hope to erect one soon, energy conservation specialists, Extension specialists.

The Program:

9:30-10:00 Registration & Coffee

10:00-10:15 Welcome & Introductions

10:15-11:20 Greenhouse Energy Retrofitting To Save Money
John Bartok, University of Connecticut

LED Lighting and Roof Ventilation
Chris Callahan, UVM Extension

11:20-11:30 Short break for light snacks

11:30-12:45 Soap Bubble Greenhouse Technology
